

**NEWSLETTER JIM**  
**VOLUME 3 – ISSUE 3**

The Journal of Innate Metabolism (JIM), the official journal of the Italian Society for the Study of Hereditary Metabolic Diseases and Newborn Screening (SIMMESN), is delighted to announce the publication of the third issue of Volume 3 on August 31, 2026.

The publication has been introduced by an **editorial** authored by Professor Andrea Pession, our distinguished Editor-in-Chief, titled “**Bibliometrics: a lifelong ascent or the Caudine Forks for the modern researcher?**”

Readers could find more contributions in the following sections:

**Inherited Metabolic Diseases in Paediatric Age**

Fecarotta S. et al. “**Enzyme replacement therapy for lysosomal storage diseases: learning from the past to shape the future**”

Costanzo M. et al. “**Communication challenges in newborn screening: what the public knows (and doesn’t)**”

**Dietetics**

Tosi M. et al. “**How reliable are large language models in metabolic dietetics? a cross-sectional benchmarking evaluation**”

**Psychology**

Russo S. et al. “**Mind the bias: mapping and mitigating cognitive errors across the expanded newborn screening pathway**”

**Visit our website and find out the latest news on the most relevant aspects of neonatal screening and hereditary metabolic diseases**
